

Ashby Conservation Commission

Minutes of Meeting on August 24, 2011

Meeting was opened at 7:50 am with Bob Leary, Cathy Kristofferson, Tim Bauman and Roberta Flashman in attendance. Meeting was held following a site visit at 117 Kendall Hill Rd.

Old Business:

93-332 - Order of Conditions for Dembowski, County Rd signed.

93-331 – Order of Conditions for Tilson signed.

The above two Orders of Conditions were signed so that they could be issued before the next meeting on September 7, 2011, which would have been exactly 21 days from the close of the hearings.

Site Visits:

117 Kendall Hill Rd. Replacement system designed by Beuchemin for MRPC. Fill will come almost to the stone wall, which is the boundary with the State property. Wetland is located on the State property. There was some standing water and sedges observed in the area where the system is to be located. Not a protectable wetland, but worrisome. Why isn't the system being locate nearer to the road? Would that have made the system too costly? Would it have created a pump up system? Would this have created the need for retaining walls?

Meeting adjourned at 8:00am

Respectfully Submitted,

Roberta Flashman
