

May 6, 2015 Hearing for 65 Damon Rd was opened at 9:00pm. Owner Edwin Aho. Presented by Neal Gorman, Ross Associates.

The project is to replace a septic system for a single family home with a working leach field. It is currently non-compliant with Title V.

Propose to pump out and back fill the trench that removes septic water from the current system and flushes it out to a wetland/stream. The aim would be to leave as many trees near the trench as possible. The Commission agrees that the ditch is a non-vegetated open ditch without rights to being called a wetland resource area.

Orders of Condition are on the ditch alone.

Plan to have the OOC completed for the meeting of May 20, 2015. Tim will write the OOC.

Motion made and 2ndd to close the hearing at 9:21pm. The vote unanimous to close the hearing.
