

Hearing opened on 10/3/2018 at 8:00pm for the NOI for upgrade of a septic system at 446 Wares Rd. Chris MacKenzie of Ducharme & Dillis presented the project. There is no DEP file number as of yet.

The edge of the leaching field is 23 ft from the edge of the stream. The leach field will be surrounded on 2-3 side by a poly barrier to prevent break out.

The hearing cannot be closed because there is no number.

New plans with some changes were submitted tonight along with a new NOI. A site visit was conducted on September 27, 2018. There appeared to be no other location on the property for the system.

Cathy could not find advertising online. No copy of the ad was presented. Chris MacKenzie will make sure that the hearing is advertised for the 3rd week in October meeting.

A motion was made and seconded to continue the hearing to Oct 17 @8:00pm. The vote was unanimous in favor of the motion.
