

Hearing Continued on 11/6 - 8pm - Stephen Marcoulier, 402 Jewett Hill Rd, NOI for crossing of intermittent stream.

Proposal – for mitigation for installation of culvert stream crossing done without NOI and with use of less than preferred materials and process.

Move existing electric fencing for animals to outside the 50 ft buffer zone.

Mark 50 ft buffer zone with markers every 50 ft. to delineate no touch zone – no mowing at all, ever. Exception for the vegetable garden, which extends into the 50 ft buffer by 8 ft.

Plant the no touch zone with fac/wet plants

Dogwood, chokeberry, elderberry, blueberry, american cranberry and holly

Add riprap to the downslope end of the culvert

Need a plan that shows all of these proposed mitigations.

No number has been assigned yet.

Motion to continue to 8:15pm on Nov 20th – vote was unanimous in favor of motion.
