

DEP#093-396

Hearing Continued on 11/20 @ 8:15pm - Stephen Marcoulier, 402 Jewett Hill Rd, NOI for crossing of intermittent stream.

The following proposal for mitigation needs to be included in the OOC.

Proposal – for mitigation for installation of culvert stream crossing done without NOI and with use of less than preferred materials and process.

Move existing electric fencing for animals to outside the 50 ft buffer zone.

Mark 50 ft buffer zone with markers every 50 ft. to delineate no touch zone – no mowing at all, ever. Exception for the vegetable garden, which extends into the 50 ft buffer by 8 ft.

Plant the no touch zone with fac/wet plants – not on the plan

Dogwood, chokeberry, elderberry, blueberry, american cranberry and holly

Add riprap to the downslope end of the culvert – He forgot to add it to the plan – he consented to adding it to the plan.

Also, need to ensure that the final plan submitted during the hearing is sent to DEP.

The applicant submitted a plan that shows all of these proposed mitigations.

An additional condition needs to require an “as-built/as-planted” plan at the completion of the project.

Motion made to close the hearing and issue an OOC. Unanimous vote in favor of the motion.

Hearing closed at 8:34pm
